

skinmade Zanitize - Hands - Ethanol-based disinfectant Effective against Sars-Cov-2 (Corona or Covid-19)

skinmade Zanitize hand disinfectant is an alcoholic perfume-free hand disinfectant for rubbing into the hands with a moisturizing and greasing effect. Without cumulative long-term active substances and therefore very well tolerated by the skin.

Areas of application

Approved as biocidal product for hygienic hand disinfection. Suitable in areas where an extended spectrum of activity is required. Wipe hands with skinmade Zanitize hand disinfectant and let dry. For hygienic hand disinfection, rub 3-5 ml solution into hands until completely dry.

Microbiological effectiveness

- | | |
|---|-------------|
| • Sars-Cov-2 (Corona respectively Covid-19) | conc. 30 s |
| • Limited virucidal according to RKI (HIV, HCV, BVDV, Vaccinia-Viruses) | conc. 15 s |
| • Hygienic hand disinfection | conc. 30 s |
| • Bactericidal (including MRSA), levurocide according to DGHM/VAH | conc. 15 s |
| • Tuberculosis-bacteria (M. terrae) | conc. 30 s |
| • Noro-Viruses (MNV) | conc. 1 min |
| • Rota-Viruses | conc. 15 s |

Compilation

- | | |
|-------------------|---------|
| • Ethanol | 76 % |
| • H2O2 | 0,13 % |
| • Glycol | 1,42 % |
| • Distilled water | 22,45 % |

Effectiveness

Sars-Cov-2 (Corona or Covid-19) Bactericidal, levurocidal, fungicidal, tuberculocidal, mycobactericidal, limited virucidal according to RKI (HBV/HIV, HCV, BVDV, Vaccinia-Viruses), Adenovirus, Poliovirus, Rotavirus, Norovirus

Authorisation

Approved as a biocidal product according to the Biocide Regulation (VO [EU] No. 528/2012) for hygienic hand disinfection with the BAuA approval number N-89415.

Physico-chemical data

Appearance: transparent liquid
Density (at 20 °C) approx. 0.81 g/cm³
Flash point: 20 °C

Containers

- 50 ml PET bottle with flip top
- 3 litre Bag-in-Box bag with integrated outlet
- 5 litre canister with screw cap
- 10 litre canister with screw cap
